# WHAT IS NATIONAL CERTIFICATE VOCATIONAL (NCV)?

The National Certificate Vocational is a new and modern qualification offered at Public FET since January 2007. It is offered at NQF Levels 2, 3 and 4. Each level takes a full year of study and is made up of **seven subjects** which are **3 Fundamental Subjects** and **4 Vocational Subjects**.

NCV is one of the high skills, high quality and high knowledge programmes intended to directly respond to the priority skills demands of the modern economy. It equips students with the necessary knowledge, practical skills and understanding of and ability to apply what they have learnt in the workplace. This qualification also provides an opportunity to enter higher education studies subject to appropriate subject combination. Although the exit level of Matric is on the same level as NCV Level 4, they are vastly different in terms of outcomes.

**NCV qualification is career oriented.**

**NCV entry requirement:** A year end school report for Grade 9 or higher qualification.
